Environmental

Hon Hai Technology Group (Foxconn) adheres to our commitment of “Sustainability Management = EPS + ESG”, with 6 ESG strategies and 32 long-term ESG targets formulated in 2022 as cornerstones to the Group’s core tenet. The environmental aspect of our ESG efforts places emphasis on green intelligence and circular economy. The Group aligns with international trends in the face of increasingly severe climate issues. We adhere to UN SDGs and support the Climate Action 100+ initiative and participated in Carbon Disclosure Project. Our overall responses to the CDP climate change questionnaire in 2021 were scored at the management level, while the three items of climate governance, Scope 1 & 2 emissions, and emission reduction initiatives were scored at the leadership level.

New in 2021:

- Submitted an application for the SBTi 1.5°C target and expect to be validated and approved by 2023.
- Initiated Task Force on Climate-related Financial Disclosures framework and became a TCFD Supporter.
- Became a founding member, committee member, and supervisor of Taiwan Alliance for Net Zero Emission. Pledged to achieve net zero emissions in offices in Taiwan by 2030 and in production bases by 2050.

Foxconn Group’s 3 Climate Targets

1. Comply with NDC or the carbon emission policies of local governments where Group Campuses are located.
2. Align GHG emissions of our value chain with the Paris Agreement and realize our goal of zero GHG emissions by 2050.
3. Respond to and act upon the 3 targets proposed by Climate Action 100+ steering committee:
   1) Strengthen climate change governance;
   2) Implement actions relating to GHG emissions within the Group’s value chain;
   3) Provide disclosure in accordance with TCFD (aim to release first TCFD Net Zero Vision Report in 2022).
## Environmental Goals and Achievements

### GHG Emissions

**GHG Target:**
- Base year: 2020

The Group’s short-, mid-, and long-term carbon emission reducing targets

<table>
<thead>
<tr>
<th>Short-term</th>
<th>Mid-term</th>
<th>Long-term</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>2025</strong></td>
<td><strong>2030</strong></td>

<td>42% Reduction</td>
<td>63% Reduction</td>
</tr>
<tr>
<td><strong>2025</strong> Air Quality Monitoring Systems Target:</td>
<td><strong>2025</strong></td>
<td><strong>2030</strong></td>
</tr>
<tr>
<td>install in 3 pilot campuses</td>
<td>Net Zero Emission in the office of our Taiwanese campuses</td>
<td>Net Zero Emission in our value chain</td>
</tr>
</tbody>
</table>

**Refine and allocate energy and carbon reduction targets to different business groups**

Formulate procedures for evaluating energy and carbon reduction management and implementation status in different business groups, and reward business groups with remarkable achievements in energy-saving measures. We conduct quarterly and annual comprehensive evaluations while also implementing regular reviews and revisions each year.

**2021:**
- Our verified Scope 1 and 2 greenhouse gas emissions in 2021 increased 14.8% compared with 2020 mainly due to revenue growth and economic expansion, which raised electricity usage and carbon emissions. However, the Group continues to be active in implementing carbon reductions and utilizing renewable energies.

**2025 Air Quality Monitoring Systems Target:**
- install in 3 pilot campuses

### Energy

**Energy Savings Target:**
- Annual energy savings rate of 5%

**2021:**
- Achieved actual energy-savings of 5.56%

**2030 Green Power Target:**
- >50%

### Waste Management

**Zero Waste Campus Target:**
- **2025 Target:** At least 5 UL2799 Zero Waste to Landfill Operations Gold-Level Certification.
- **Mid to Long-term:**
  - Zero-Waste Campuses that implement “zero landfill” policies. We have signed memorandums of cooperation with UL international verification institutes and aim to build “Zero Waste Pilot Campuses” through incorporation of Turbo Waste management systems, digital management of waste using cloud technologies, and quantitative systems that enable waste reduction.

**2021:**
- Conducted external audits for management systems such as ISO 14001, ISO 50001, and ISO 14064-1

**Wastewater discharge and water quality monitoring system target:**
- 100% installation

**2025 Recycled Plastics Target:**
- Internally 60% recycled

**Conducted external audits for management systems such as ISO 14001, ISO 50001, and ISO 14064-1**
Key Environmental Metrics

No major environmental protection violations in 2021.

Investment on Energy-Saving Projects
Invested in energy-saving projects encompassing transformation of energy-saving production processes, improvement of air-conditioning systems/air compressors/lighting equipment, and other improvements.

Patents for Low-Carbon and Clean Technologies

<table>
<thead>

Notes:
1. Emissions factors for natural gas and heat were derived from China's "Guidelines for Accounting Methods and Reporting of Greenhouse Gas Emissions of Electronic Equipment Manufacturing Enterprises (Trial)"; emission factors for diesel and gasoline were taken from the UK's "2020 Government Greenhouse Gas Conversion Factors for Company Reporting"; emission factors for electricity used the electricity emission factor for China (0.6167kg CO₂e/kWh) taken from the IEA Emission Factors 2020.
2. The Global Warming Potential (GWP) used in the table was taken from the "IPCC Fourth Assessment Report (2017)."
3. GHGs include CO₂, CH₄, N₂O.
4. We used the financial control criteria to compile GHG emission.
5. Due to the widespread operational scope of the Group, we are still compiling data on Scope 3 GHG emissions for 2021, and aim to disclose this information at the end of 2022.
### Energy Management

**Climate Change Response and Management**

In 2021, the Group officially became a TCFD supporter and committed to implementation of TCFD guidelines. Since the end of 2021, we began assessing relevance of climate change and business activities through the TCFD framework, and have conducted a series of scenario analyses incorporating risk management and climate impacts to further disclose the resilience of our responses to climate change.

- **Phase 1**
  - Release our first Net Zero Vision Report in 2022 to detail our climate governance, strategies, risk management, and indicators and goals.

- **Phase 2**
  - Aim to conduct analyses and discussions of climate scenarios, as well as quantitative financial impacts.

- **Phase 3**
  - Integrate results from the first and second phases to generate standardized forms and processes that extend the scope of climate-related financial assessments to the whole world.

Following identification of water resource risks, we began promoting various water-saving measures and reducing discharge of standard wastewater to achieve our goals relating to effective usage of water resources, reduced wastewater discharge, and decreased environmental impacts. At present, the measure for water saving is to increase the reclaimed water reuse rate; Longhua site is to reuse reclaimed water for toilets. For further details on climate risks and opportunities analysis see “Climate Change” 2020 CSR Report.
Chemicals Management

Hazardous Chemicals:
For effective control, chemicals used in all Campuses for production, non-production, and laboratory processes are compared with lists of prohibited, restricted, and controlled substances to identify hazardous substances and through the “Group Chemicals/Substances Management Regulation” we continually replace and reduce the use of hazardous substances.

In 2021, the group used 138,000 tons of hazardous substances, an increased usage compared with the previous year due to expanded scope and increase in production.

Promote Green Chemicals:
In April 2021, the Group collaborated with clients to launch a green chemical promotion project which aimed to increase transparency of disclosed chemical safety information, safe chemical usage, and safer alternatives (green detergents) as part of our gradual transformation to a green and sustainable enterprise.

<table>
<thead>
<tr>
<th>Project Implementations</th>

</tr>
<tr>
<td><strong>Green Chemical Alternatives</strong></td>
</tr>
<tr>
<td>• Selection of safer detergents</td>
</tr>
<tr>
<td>• Process incorporation</td>
</tr>
<tr>
<td>• Usage confirmation</td>
</tr>
</tbody>
</table>

Green Chemistry Culture:
The Group has adopted the “12 Principles of Green Chemistry” to decrease or eliminate hazards to human health and the environment caused by chemicals. The Group requires all units and suppliers involved in chemical production, usage, procurement, and exposure to facilitate organizational training and implement widespread dissemination.

Industry Leader in Promoting Chemical Safety:
External organization collaborations:
• IPC – formulating detergent regulations for electronics industry;
• ChemFOWARD – collecting relevant health and safety data to build a shared platform for disclosures of green detergents, encouraging our upstream and downstream value chain partners to reduce environmental impacts from chemicals.
Human Rights and Workforce

Our Principle of Social and Environmentally Responsible Code of Conduct (available on our Company website) is founded upon the standards of RBA Code of Conduct, the Universal Declaration of Human Rights (UDHR), and the standards of the International Labour Organization (ILO).

Zero tolerance and prohibition of:

- Regulatory violations
- Corruption
- Bribery
- Theft of corporate funds
- Profit from illicit activities
- Trafficking or any form of slavery
- Child labor or forced labor
- Indentured labor
- Forced labor to repay debt
- Prison Labor

All employees receive at least two hours of anti-corruption training annually.

Support for and integrated into the Group’s recruitment principles and processes:

- Equal opportunities/ equal employment
- Respect for human rights
- Workplace diversity
- Non-discrimination policy
- Responsible sourcing of minerals
- Anti-corruption Policies
- Anti-trafficked & forced labor
- Health and safety principles
- Rotating safety inspections of all factories

No incidents involving discrimination, use of child labor, or forced labor occurred in our Campuses in 2021.

Goals

Short-term goal:

- Comply with UN human rights guidelines and extent to our value chain to ensure joint compliance.
- Increase number of annual labor rights audits at our internal Campuses and supply chain vendors from 30 to more than 50.

Medium and long-term goals:

- No violations of equal employment regulations
- Retention rate of 88% for professional and technical personnel.
- Maintain our record of zero major labor rights incidents
- Cultivate innovation and work habits to promote continuous learning and growth in our employees, create products and technologies to enhance human happiness, and provide an average of 60 hours in professional training courses for professional and technical personnel each year.

The proportion of senior management personnel (ranked at director level or above) who are Chinese nationals is approximately 11.70% at our factories in China. The Group also employs a total of 47,918 ethnic minorities from all regions, accounting for 5.0% of its workforce in fiscal 2021, and their salaries, promotions and education rights are no different from the general workforce. Among the top ten ethnic minorities, 2.4% hold supervisory positions.

---

**Energy-Saving Incentive Mechanisms**

"Appraisal Items and Scoring Guidelines for Energy Management" is used in our Chinese Campuses. In 2021, we awarded NTD1.57 million of bonuses and incentives to 5 teams and 5 individuals with outstanding energy-saving contributions.

---

**Employee Welfare**

The Group’s well-developed employee care network also promotes work-life balance with integrated facilities at each of the Group’s plants.

---

**2021 employee salaries and benefits cost approximately NTD 303.1 billion.**

2021 activity subsidies amounted to NTD 310 million.

---

**Retirement**

The Group handles retirement applications, pension payments and contributions to employee retirement funds in accordance with local laws. A Labor Retirement Reserve Supervisory Committee has been established in Taiwan and is re-elected every three years to review the amount of employee retirement reserve contributions, deposits and payments to ensure the rights and interests of the Group’s employees. Information on the payment of pensions to employees in 2021 can be found in the Group’s 2021 annual report.

---

**Maternity Allowances, Parental Leave, and Retention**

The Group began promoting a maternity policy and announced an optimized childcare subsidy program, “Childcare Subsidies for 0- to 6-Year-Olds,” in early 2020, setting a precedent in Taiwan. The Group provides a comprehensive range of subsidies to expectant mothers before, during, and after pregnancy. A total of NTD310 million in subsidies were distributed benefiting 1,020 employees in 2021. This allowance makes employees feel more at ease with childbirth, also achieves the effect of retaining talents.

**Labor Management**

**Labor Protection**

Our Labor Union was established in 2007 in accordance with local regulations and currently encompasses employee unions with four management levels and five ranks. Labor Union Unit leaders are elected in a bottom-up, open, and democratic manner by union members from voluntary candidates and union representatives at all levels are elected at member representative conferences.

The Labor Union signed the “Foxconn Technology Group Collective Agreement,” which covers the 96 legal entities of the Group and provides basic protection of employee rights, such as 30 working days notification in advance of major decisions related to their vital interests. In 2021, the Labor Union gathered our 19 unions and convened 21 labor delegates meetings to vote on issues relating to employee rights and obligations.

*In 2021, 95% of our employees are union members.*

The Labor Protection Supervisory Committee established under the Group’s Labor Union carry out inspections of ethical, health and safety, environmental, and management systems. Investigations are concluded only when Campuses have proposed corrective action programs and improvements plans.

**2021 investigations – no major deficits discovered**

- 23 campus inspections
  - 194 deficits (non-systemic issues such as machinery safety measures, working hours, proportion of temporary workers, and occupational safety)

**Rectification**

- 176 deficits corrected and confirmed by Labor Protection Supervisory Committee, rectification rate of 90.7%.

---

**Talent development platform:**

1. Build an environment conducive for learning to form a learning-oriented organization.
2. Complete digital and professional learning platform.
3. Continue to develop professional courses and class materials.

---

**Occupational skills**
- PMP certification
- Logistics management
- HR management
- Visualization
- Office software
- Six sigma

**Four Cores of smart manufacturing**
- Lean IE
- Automated robots
- Information technologies
- AI and big data
- Karakuri
- IoT

**Employees and elite employees**
- Corporate culture
- Bylaws
- Self-management
- Mental health

- Academic education
Response to Controversies

<table>
<thead>
<tr>
<th>Date</th>
<th>Controversies</th>
</tr>
</thead>
<tbody>
<tr>
<td>Aug 2021</td>
<td>Criticism over allegations of poor working conditions, low wages and over-reliance on temporary worker.</td>
</tr>
<tr>
<td>Mar 2022</td>
<td>Allegations of forced labor of Uyghurs</td>
</tr>
<tr>
<td>Jan 2022</td>
<td>Protests over living conditions in employee dormitories</td>
</tr>
<tr>
<td>Nov 2020</td>
<td>Alleged unpaid wages and rewards to dispatch workers</td>
</tr>
</tbody>
</table>

Company Response
- The Group emphasizes the working conditions of interns and strives to ensure that all interns get the treatment they deserve.
- Our policies prohibit discrimination and forced labor, also publicly releases our reports and announce grievance channels, the 78585 hotline, which was upgraded in 2021 to provide greater efficiency and access.
- We have been working on a series of improvements to fix issues we found at the offsite dormitory facilities at Sriperumbudur and to enhance the services we provide to our employees. We have implemented a range of corrective actions to ensure this cannot happen again and a rigorous monitoring system to ensure workers can raise any concerns they may have, including anonymously.
- We will gradually begin to welcome back team members as each offsite dormitory becomes ready and is approved. We continue to support our employees and thank them for their patience as we work through the improvements.
- Signed an “Agreement for Dispatching Temporary Personnel” with staffing agencies used by all Campuses. The Agreement stipulates the responsibilities and duties of both parties, and guarantees equal pay for equal work, equal work environments, and work safety measures.

Communication and Grievance Channels
- Dispute Mediation: Committee on labor dispute mediation
- Seminars and Visits: Seminars and on-site visits (restaurants, dormitories, production lines)
- Mailboxes: Mailboxes for feedback to labor unions and union chairman
- Telephone Hotlines: Employee care hotline, rights protection hotline, union chairman hotline
- Legal Aid: Corporate lawyers
- Website Visits: Union network, employee care center

The Group provides 24/7 year-round communications hotlines that can be called if assistance is needed.
- Employee care hotline 78585
- Spiritual care hotline 25885
- Marriage mediation hotline 18675578585
Supply Chain Management

The Group is actively engaged in the implementation of supply chain management practices to develop efficient long-term collaborative relationships with suppliers, as well as environmental, social and governance risk assessments and audit verifications which allow joint fulfillment of corporate social responsibilities by suppliers. This serves to strengthen the resilience of our supply chain, reduce operational risk, and ensure sustainable management.

Goals

Short-term goal:
- Reduce annual procurement amounts or total procurement amounts by 2-5% for suppliers with poor ESG achievements.
- Achieve 100% survey response rates regarding use of conflict minerals from suppliers

Mid to long-term goals by 2030:
- Require full materials declarations by all key electronics suppliers on RoHS and REACH management platforms.
- Conduct performance appraisals of specific supplier ESG items (including green products, social and environmental responsibilities, and carbon management), and increase coverage to 100%.
- Increase three-year audit coverage of specific institutional suppliers to 90%.
- Increase the number of key electronics suppliers that commit to use 100% of renewable energies for production of Foxconn products to more than 45.
- Increase the number of specific electronics suppliers with Zero Waste to Landfill Operations verifications from the current 3 to more than 25.

Supplier Management Policies and Processes

STEP 1
Regulatory Compliance

<table>
<thead>
<tr>

<th>Management measures</th>
</tr>
</thead>
<tbody>
<tr>
<td>● RBA standards</td>
<td>● Suppliers must sign and comply with relevant statements</td>
</tr>
<tr>
<td>● Legal requirements</td>
<td>● Online learning</td>
</tr>
<tr>
<td>● The Group Supplier Social and Environmental Responsibility Code of Conduct</td>
<td></td>
</tr>
</tbody>
</table>

STEP 2
Risk Assessment

Group Suppliers Risk Assessment Processes

1. Need for new suppliers
2. Supplier confirmation
3. Sign statement of commitment
4. Respond to sustainability commitment
5. Periodic assessments and audits
STEP 3 Audit Verification

Strictly Prohibit
- Use of child labor
- Use of forced labor/prison labor
- Discharge of untreated toxic and hazardous substances or materials

New Supplier Requirements
Management System
Passed ISO 14001, ISO 45001, ISO 14064, and QC 080000 system certification.

ESG Risk Assessment
Working hours, salary and benefits, environmental assessment approval, environmental violations, dangerous procedures, and management systems.

ESG Audit
We use the RBA VAP Audit Checklist when conducting audits.

Notes:
- QPA: Commodity Quality Process Assessment
- QSA: Quality System Assessment
- SCM: Supplier Chain Management Assessment
- GP: Green Product Assessment
- GHG: Greenhouse Gases
- CSR: Corporate Social Responsibility

Audits conducted in 2021 found no incidents relating to child labor, forced labor, or prohibitions of employee freedom of association.

The Group encourages suppliers to complete third-party RBA VAP audits; suppliers that have completed said audits within the past two years can share their audit reports with the Group to be exempt from repeated audits conducted by our audit teams.

STEP 4 Continuous Improvement

Implementation principles
- Request supplier on-site audits
- Improve defects

Management measures
- Audits
- Improvement actions
- Verification of improvement results
Green Product Design and Management

We have established green product management guidelines, supplier green product management mechanisms and platforms, corresponding management regulations, and standards for restriction of hazardous substance usage. We track the green credentials of our raw materials starting from our upstream suppliers, prohibit use of chemical substances restricted by the green product regulations of different countries and regions, and require our suppliers to disclose the amounts of hazardous substances contained within their products.

Green Product Designs within the Group

Energy-saving  Non-harmful  Reduction  Easily Recyclable

Responsible Mineral Procurement Management

The Group does not directly purchase raw materials from smelters or refineries, but purchases components that possibly contain conflict minerals. The Group has developed a management platform for conflict minerals. All our business units use this platform to collect, review, and compile supplier conflict minerals due diligence reports, and the data is stored and tracked over the long term.

As a member of the RMI, the Group is attentive to updates on responsible mineral sourcing released by the RMI and has adopted the CMRT (Conflict Minerals Reporting Template) and CRT (Cobalt Reporting Template) developed by the RMI. We conduct due diligence on our suppliers and require new suppliers to use smelters/refineries that adhere to the RMI RMAP (Responsible Minerals Assurance Process).

In 2021, the Group completed conflict minerals investigations for 1,569 suppliers through our conflict minerals management platform. Supplier response rates were 100%.

Not yet discovered supplier products containing tantalum, tin, tungsten, gold, or cobalt from conflict areas in the Democratic Republic of Congo and surrounding countries.

For full details see 2021 Sustainability Report.
**Energy and Carbon Reduction**

“We also incorporated our suppliers in our long-term ESG goals and plan to track supplier performance on green products, environmental protection, use of renewable energies, carbon management, zero waste to landfill operations, and other CSR aspects.”

Chairman, Young Lin

---

### The Group’s energy and carbon reduction strategy for suppliers

#### Phase 1
Encourage suppliers to conduct internal carbon emissions inventory according to ISO 14064-1 standards.

#### Phase 2
Encourage suppliers to formulate and implement carbon reduction plans, and review achievement progress.

#### Phase 3
Encourage suppliers to formulate and implement carbon neutrality plans to gradually achieve specified targets.

---

#### Step 1: Carbon inventory (Short-term)
- Collection of enterprise carbon emissions data
- Pass third-party verification
- External carbon disclosures

#### Step 2: Carbon reduction (Mid-term)
- Energy-saving transformations: Conversion to low energy-efficiency equipment
- Energy monitoring: Establish Energy Management Center
- Target management: Implementation of carbon reduction targets

#### Step 3: Carbon neutrality (Long-term)
- Comply with the Group’s CA100+ initiatives
- Formulate low-carbon transformation strategies
- Install solar power generators or purchase clean energies

---

The Group has established a supplier carbon management system and requires suppliers to upload carbon emission volumes and relevant data each year. In 2021, the Group assisted 88 suppliers in implementing greenhouse gas inventories through the system; 51 suppliers also completed ISO 14064-1 verification. Suppliers implementing carbon reduction plans lowered their carbon emissions by 99,296.93 tCO2e in 2021.

---

The Group plans to assist 165 suppliers in conducting energy and carbon reduction tasks by 2025.

---

### Occupational Health and Safety

**Goals**

**Short-term goal:**
- No operational incidents accumulated hours (Huyue Campus: 12million hours, Dingpu Campus: 2.8million hours)

**Mid to long-term goals by 2030:**
- Disabling injury frequency rate: less than 0.14 incidents/million working hours (significantly lower than industry standards)
- Disabling injury severity rate: less than 6.88 days/million working hours
- Assist more than 70% of high-risk contractors in obtaining ISO 45001 verification
To enhance employee and contractor safety awareness and capabilities, the Group has formulated “Safety Training Systems” and “Procedures for Management of Supplier Production Safety” with clear stipulations for Group employee and contractor training.

### 16 main business groups have all implemented ISO 45001 OHS Management Systems and have been verified by third-party institutes.

**Note:**
1. The aforementioned ratios are calculated on a basis of 1,000,000 work hours.
2. The Group starts to count the number of false alarm events in 2021.
3. The above data only includes the Greater China region.

The Group strives for safety and zero accidents as its goal and has taken various measures to strengthen the safety of employees as much as possible. The main current measures include:

1. **Strengthen the main responsibility of management and awareness for production line employees**
   - Business group/department supervisors (deputy general manager and above, production-related supervisor) completes at least 1 safety inspection on a monthly basis.
   - Factory directors (or equivalent) holds at least 1 hour occupational safety meeting on a weekly basis.
   - Production line lead organizes the on-duty operators to hold a pre-shift safety publicity meeting for at least 3 minutes every day.
   - In the daily safety audit of the park and the central quarterly safety audit, cumulative number of significant implicit safety hazards are used as a mechanism for subsequent actions, including:
     i. A written report signed by the general manager to the director of fire and operational safety;
     ii. Director of fire and operational safety interview with the supervisor responsible implicit hazards, and;
     iii. Head of the unit responsible for the implicit hazard to submit an improvement report at the Global Epidemic Prevention and Operational Safety meeting, etc.;

2. **Carry out targeted safety projects for high-risk sources of danger**
   - Eliminate major sources of work-related injury hazards, and promote the safe management and control of molding, robots, and automation equipment.
   - Comprehensive risk identification, location and equipment with high risk of mechanical injury, and comprehensively post warning signs and operation signs.

3. **Use information technology to improve early warning and disposal of risks**
   - Establish the “Group Operational Safety Supervision Information Platform”, integrate the offline safety management process forms and safety related information of each site; and through the platform, conduct smart big data analysis and calculation for early warning, to assist supervisors in safety management and decision-making.
The Group's latest Board of Directors was newly elected on May 31, 2022 with term of office from July 1, 2022 to June 30, 2025. The Board consists of 9 directors, including 5 independent directors (55% of Board) and 2 female directors (22% of Board). Employees of the Company account for 33.33% of the Board. Please refer to our website or CSR report for Board of Directors' experience and expertise.

Aim to increase female representation on board of directors to 30%

The Board convened 6 times in 2021 and average attendance rate was 96.3% (including Mr. Terry Guo's attendance by proxy).

The current term of Audit Committee is from July 7th 2022 to June 30th 2025.
The current term of Compensation and Nomination Committee is from August 10st 2022 to Jun 30th 2025.

**Sustainability Committee**

The Group Global CSR Committee was established in March 2007 and was renamed the Sustainability Committee in 2022. The Committee is headed by Group Chairman Young Liu and has established a promotion office staffed with a dedicated team. The Sustainability Committee reports periodically to the Chairman and implementation results of corporate sustainability items are reported to the Board at least once a year.
Information Security Management

The Group has established an Information Security Committee headed by our Chairman. The Committee regularly convenes for management review meetings to establish and review information security management targets and policies. In order to effectively promote information security policies, the information security unit has established affiliate processes and operation, audit, education and training, and emergency response teams which are supervised by senior management personnel from relevant departments to ensure that the information security management system of the Group can operate continuously and stably.

The Group has implemented the ISO 27001 Information Security Management System, which allows for effective enforcement of our information security policy, better protection of client information and corporate intellectual property, strengthened response capabilities to information security incidents, and establishment of information security policy evaluation parameters.

We conduct 10 critical system penetration tests each year and have conducted 494 security training sessions for management, IT, general employee and external personnel in 2021. Each professional technician is required to receive at least 8 hours of training per year.

Additionally, internal and external professional auditors perform two audits on corporate information security management systems for the Group each year.

No major incidents that impacted corporate operations or infringed upon client privacy occurred in 2021.

Ethical Management

The Group upholds a corporate culture of integrity and ethical management, adopts a zero-tolerance policy toward any behaviors and activities violating these regulations, and is committed to full compliance of international and domestic anti-corruption and anti-bribery regulatory requirements.

All employees must sign the “Employee Declaration”, “Employee Integrity Commitment”, “Honesty, Integrity & IP Protection Agreement,” “Confidentiality Agreement,” and "IP Confidentiality Agreement” when entering the company.

The Group Code of Conduct (CoC) is based on the RBA Code of Conduct which encompasses 8 main aspects. Training courses are provided to all new recruits and continued annual compliance training for existing employees.

Whistle-blowing/ Grievance Reporting System

The Group encourages reporting of any illegal behaviors, protects the confidentiality of informants, and allows for anonymous reporting to ensure that the identities of Whistle-blowing suppliers and employees are kept confidential. The process is governed by our internal regulation “Fraudulent Inspection Act”. The Group’s point of contact immediately notifies dedicated units upon receiving reports and organizes a special team to investigate the suspected malpractice described in said report. The Group keeps informant identities and report contents confidential, and provides the results of its investigations via email.

Mechanism for reporting is accessible from our website “Whistle-blowing Contact” and CSR report.

Internal Audit Operations

Internal auditors adhere to principles of independence and adopt an objective and fair viewpoint when implementing their duties and ensuring that they complete due diligence procedures. Audit managers regularly report audit matters to the Audit Committee and the Board.

The Group’s Chief Audit Executive attends the “Internal Audits and Responses to ESG Trends” seminar, which enhanced ESG awareness in internal audit units. The Chief Audit Executive helped to organize this event.

Internal Controls and Audit

1. Professional Certifications
   - CIA, CEAP, CPA, CCSA, CISA

2. Internal Audit Training
   - 2,115 hours

3. Total Number of Internal Control Self-Assessment Activities
   - 20,022 activities

4. Digital Transformation
   - Quick-screening for subsidiaries: Set specific financial indicators for different subsidiaries, automatically monitor abnormal indicators through our system, and allow auditors to track subsidiary financial risks and strengths through cloud technology.
   - Continued auditing platform: Conduct continued auditing and analysis procedures through computers to quickly and accurately convey data analysis results to auditors for enhancement of auditing efficiency.
   - Process automation: Reduce routine inspection times by more than 50% through the use of robots that conduct repetitive and tedious tasks, and utilize the surplus time to increase inspection frequency and inspection scope, thereby enhancing audit quality.
